Vol. 27, No. 3 PSYCHOLOGICAL REVIEW PUBLICATIONS March, 1930

Psychological Bulletin

EDITED BY
SAMUEL W. FERNBERGER, UNIV. OF PENNSYLVANIA

HOWARD C. WARREN, PRINCETON UNIVERSITY (*Review*)
RAYMOND DODGE, YALE UNIVERSITY (*Monographs*)
MADISON BENTLEY, CORNELL UNIVERSITY (*J. of Exp. Psych.*)
WALTER S. HUNTER, CLARK UNIVERSITY (*Index*)
HERBERT S. LANGFELD, PRINCETON UNIVERSITY, *Business Editor*

WITH THE CO-OPERATION OF
G. W. ALLPORT, DARTMOUTH COLLEGE; J. E. ANDERSON, UNIVERSITY OF MINNESOTA; J. E. COOVER, STANFORD UNIVERSITY; W. T. HERON, UNIVERSITY OF MINNESOTA; K. S. LASHLEY, CHICAGO, ILL.; M. F. MEYER, UNIVERSITY OF MISSOURI; J. T. METCALF, UNIVERSITY OF VERMONT; R. PINTNER, COLUMBIA UNIVERSITY; E. S. ROBINSON, YALE UNIVERSITY.

COMPARATIVE PSYCHOLOGY NUMBER

EDITED BY
W. T. HERON

CONTENTS

The Rat. A Bibliography: L. E. DRAKE and W. T. HERON, with the assistance of M. BURLINGAME, L. E. BALLACHEY and G. PAULSEN, 141.
Notes and News: 240.

PUBLISHED MONTHLY (EXCEPT AUGUST AND SEPTEMBER)
FOR THE AMERICAN PSYCHOLOGICAL ASSOCIATION
BY THE PSYCHOLOGICAL REVIEW COMPANY
372-374 BROADWAY, ALBANY, N. Y.
AND PRINCETON, N. J.

Application for entry as second-class matter at the post-office at Princeton, N. J., and an additional entry at Albany, N. Y., pending.

Psychological Review Publications
of the
American Psychological Association

EDITED BY

HOWARD C. WARREN, PRINCETON UNIVERSITY (*Review*)
MADISON BENTLEY, CORNELL UNIVERSITY (*J. of Exp. Psych.*)
RAYMOND DODGE, YALE UNIVERSITY (*Monographs*)
SAMUEL W. FERNBERGER, UNIV. OF PENN. (*Bulletin*)
WALTER S. HUNTER, CLARK UNIVERSITY (*Index*)
HERBERT S. LANGFELD, PRINCETON UNIVERSITY, BUSINESS EDITOR.

WITH THE CO-OPERATION OF
MANY DISTINGUISHED PSYCHOLOGISTS

PSYCHOLOGICAL REVIEW

containing original contributions only, appears bi-monthly, January, March, May, July, September, and November, the six numbers comprising a volume of about 500 pages.

PSYCHOLOGICAL BULLETIN

critical reviews of books and articles, psychological news and notes, university notices, and announcements, appears monthly, the annual volume comprising about 720 pages. Special issues of the BULLETIN consist of general reviews of recent work in some department of psychology.

JOURNAL OF EXPERIMENTAL PSYCHOLOGY

containing original contributions of an experimental character, appears bi-monthly, February, April, June, August, October, and December, the six numbers comprising a volume of about 500 pages.

PSYCHOLOGICAL INDEX

is a compendious bibliography of books, monographs, and articles upon psychological and cognate topics that have appeared during the year. The INDEX is issued annually, in June, and may be subscribed for in connection with the periodicals above, or purchased separately.

PSYCHOLOGICAL MONOGRAPHS

consist of longer researches or treatises or collections of laboratory studies which it is important to publish promptly and as units. The price of single numbers varies according to their size. The MONOGRAPHS appear at irregular intervals and are gathered into volumes of about 500 pages.

ANNUAL SUBSCRIPTION RATES

Review: $5.50 (Foreign, $5.75). Monographs: $6.00 per volume (Foreign, $6.30).
Journal: $6.00 (Foreign, $6.25). Psychological Index: $4.00.
Bulletin: $6.00 (Foreign, $6.25).
Current numbers: **Review** or **Journal**, $1.00; **Bulletin**, 60c.
Review and Bulletin: $10.00 (Foreign, $10.50).
Journal and Bulletin: $11.00 (Foreign, $11.50).
Review and Journal: $10.00 (Foreign, $10.50).
Review, Bulletin and Journal: $15.00 (Foreign, $15.75).
Review, Bulletin, Journal, and Index: $18.00 (Foreign, $18.75).

Subscriptions, orders, and business communications may be sent direct to the

THE
PSYCHOLOGICAL BULLETIN

THE RAT

A Bibliography

L. E. DRAKE and W. T. HERON, with the assistance of MILDRED BURLINGAME, L. E. BALLACHEY, and G. PAULSEN
University of Minnesota

This bibliography was started with the idea of annotating the references but it was found that space would not allow this unless only a small minority of references was included. We have taken the alternative of including the majority of references and compiling an analytical index.

The bibliography covers the years 1924 to 1929 inclusive, except that the psychological references are complete for all years. Time and space has not allowed us to cover foreign journals. It is too much to hope that some errors have not occurred but we believe that they are not many. We trust that the bibliography will be of use to other scientists as well as psychologists.

The following journals have been used in the compilation of this bibliography. In the majority of cases the files are complete to the end of 1929.

American Journal of Anatomy	Amer. J. Anat.
American Journal Diseases of Children	Amer. J. Dis. Child.
American Journal of Hygiene	Amer. J. Hyg.
American Journal of Medical Sciences	Amer. J. Med. Sci.

INDEX

Activity (see also Exercise), 965, 1042, 1055, 1060.
Apparatus for study (see Apparatus).
Effects upon of: adrenalectomy, 537; alcohol, 966; castration, 344, 346, 534, 968, 1258; cerebral destruction, 685; hysterectomy, 266; nutrition, 504, 505; ovarian follicular hormone, 106, 264, 1062; phosphate feeding, 1044; starvation, 505, 536; testicular grafting, 535, 968; thyroidectomy, 537, 538, 702; tobacco smoke, 316.
Normal over life span, 1057.
Relation to: after-rest, 1043; adrenals, 262, 1236; age, 1043, 1057; basal metabolism, 702; brain weight, 1045; fatigue, 96; forced exercise, 1020, 1071; learning, 1045; myelinization, 20; ovariectomy, 263, 1063, 1259; pseudopregnancy, 1070; sex, 501; sex phenomena, 1058, 1059, 1064, 1065, 1254.
Rhythms, 197, 1043, 1061.
Adrenalectomy, 711.
Relation to: anaphylaxis, 326, 1328; blood sugar, 1326; formation of pulmonary plugs, 1180; histamin poisoning, 930, 1324; non-protein nitrogen and urea in blood, 1327; oestrous cycle, 1322; reproduction, 1322; resistance to drugs, 208, 977, 978, 1202; resistance to typhoid, 598; thymus, 595, 596; toxic effect of killed bacteria, 1018; thryoidectomy and forcing fluid, 1325; weight, 597.
Adrenalin on ketosis, 16.
Adrenals
Cortex: compensatory hypertrophy, 759; effects of feeding on growth and maturity, 158, 793; relation to testis, 1276.
Extirpation (see Adrenalectomy).
Medulla: feeding on growth and maturity, 158, 793.
Relation to: cholesterol metabolism, 849; fatigue, 1174, 1236; fever, 202; infection, 202; pregnancy, 252; temperature, 1174, 1236; vitamin deficiency, 322.
Transplantation, 598.
Weight in: pregnancy, 251; rickets, 587.
Age
Equivalence of, in animals, 101.
Relation to: activtiy, 1043; composition of body, 1035; learning (see Learning).
Alcohol
Absorption of higher, 145, 950.
Hereditary resistance to, 429, 430.
Relation to: activity, 966; birth weight, 431; eye defects, 433; fertility, 35, 426, 428; growth, 966; learning, 35, 758, 787, 789; litter size, 35, 431; reproductive tissue, 870; weight, 427.
Alternation problem (see Apparatus and Learning).
Aluminum in diet, 777, 887, 1220.
Amino acids (see also name of specific acid).
In tissues, 749; insulin upon, content of blood, 752; metabolism of, 750, 1315; method of estimating, 634; tryptophane, 1156.

Anaesthetics
Synergistic analgesia and anaesthesia, 379.
Toxicity of: alkamine esters of aromatic acids, 529; derivatives of para-amino benzoic acid, 996.
Anaphylaxis, 923.
Anemia
Iron and fat in recovery from, 1016.
Relation to: amount of haemoglobin, 1017; blood volume, 1017; copper in food, 1247, 1248; diet to overcome, 857, 1244, 1245; in rice disease, 47, 1294; splenectomy, 121.
Apparatus
Activity, 967; analysis of technique, 1042; revolving drums, 967, 1056; tambour cages, 965.
Animal board, 553.
Cages, 741.
Feeding devices, 511, 924.
Ideational behavior, 115, 1335.
Learning
Mazes: 1223. Alternation, analysis of technique, 131, 230, 235, 547, 570, 571, 572, 576, 926, 1200; circular, construction of, 17, 1274; elevated, 829; graphic method, 621, 1278, 1337; inclined, sectional, 715, 1264, 1265; self-recording, 1199, 1201; temporal, 569, 575; tunnel, 1203.
Problem boxes, 600. Analysis of technique, 474; inclined plane, 1133, 1216; latch-box, 1215.
Maternal behavior, study of, 1126.
Motivation, 601, 1270; nitrogenous metabolism, 839; non-electrical rotation table, 315; respiratory quotient, 1288; sensory processes, 1223; vision, 605, 1135, 1281, 1338.
Atropin on learning, 799.
Arginine, effect on growth, 980.
Arsenic
Toxicity: reduced by injection of glutathione, 1239; reduced by feeding cysteine, 1239.
Audition (see Discrimination).

Bartonella muris, cause of anemia, 121.
Belladonna alkaloids on maze running, 243.
Benzyl benzoate, on maze running, 803.
Bile salts, on maze running, 800, 801.
Biliary
Cirrhosis, produced by salts of manganese, 320.
Tract, 495.
Bipedal habits on growth, 166, 167.
Blood
Acid base equilibrium, 456.
Anemia (see Anemia).
B. Gartner, 947.
Erythrocyte counts, 47.

Blood—continued
Glutathione in corpuscle, 521.
Hemoglobin (see also Anemia)
Age, 1304; amount in anemia, 1017; copper in diet, 454, 792, 1195; dual function, 351; fetuses, 899; manganese in diet, 1195; medicinal iron, 1306; on spinach diet, 856; proteins in diet, 124; vitamins in diet, 124.
Hematopoiesis. Vitamin deficiency, 1170, 1171, 1172.
On morphology of tissue in vitro, 50.
Phosphate in relation to rickets, 139, 648.
Phosphorus in relation to rachitic diets, 267.
Platelets. Megakaryocyte origin, 57; vitamin A deficiency, 58, 203, 1104.
Plasma calcium. Parathyroidectomy, 1211.
Pressure, 265.
Sugar. Relation to: suprarenal insufficiency, 644; vitamin B deficiency, 815.
Serum in thyroid-parathyroidectomy, 382, 387.
Suprarenalectomy (see Adrenalectomy).
Volume, 47. Technique for determination, 123, 1285.
Blood vessels. Development of vena cava, 116.
Bone
Ash and rachitic diets, 267, 268.
Calcification. Diets upon, 873; inorganic factors determining, 1024; interference with, by cereals, 367; in vitro, 1041; irradiation of environment, 555; primary, 667.
Cells. Phagocytic activity, 53.
Epiphyseal union, 237.
Growth. Chemical changes, 398, 399, 400; determinants, 401.
Marrow. Vitamin deficiency, 322.
Mineral content, 836.
Ossification and phosphoric esterase, 974; in rickets, 975; praeclavium location, 236.
Transplantation, 735.
Weight compared with length, 397.
Brain
Content. Alcohol according to sex, 1253; creatine, 146; glutathione, normal 1187, tumorous 1241.
Forced exercise, 1020.
Weight. Relation to: activity, 1045; rickets, 587.
Brightness discrimination
Cerebral destruction, 685.

Caffeine (see Learning).
Calcium
Absorption, 67; in large and small intestine, 69.
Assimilation in relation to magnesium, 289.

Calcium—continued
Content of body in relation to: age, 1033; cows' milk, 88; food, 821, 1033, 1113; growth, 1033; inanition, 821; irradiation of: cholesterol, 487, ergosterol, 669, rickets-producing diet, 1108; vitamin D deficiency, 644.
Deficiency: size of parathyroids, 746.
Effects of in food
Diet deficient in phosphorus, 357; excessive amounts in relation to the young of pregnant mother, 662; variation in amount, 472; vitamin A deficiency, 357.
Excretion of, in relation to potassium, 834.
Retention: method of estimating, 86.
Cancer, 23, 25, 111, 754, 883.
Effects of copper compounds upon growth of, 493.
Ester-hydrolyzing action on esters of preparations, 310.
Embryonic tissue, 110.
Growth of mouse cancer in rats, 352.
Immunity, 149, 694, 695, 696, 753.
Metabolism in immune and normal, 245.
Production of by: radium, 882; X-rays, 882.
Cannibalism on restricted diets, 1075.
Carbohydrates, 852, 853.
Absorption, 67.
Interaction of glucose, insulin, and muscle tissue, 45.
Metabolism, 183.
In relation to: epinephrine, 181, 182; insulin, 182; vitamin B deficiency, 138.
Cardiac glands, 61.
Carotid body. Origin and development, 1082.
Castration (see also Gonadectomy).
Effect upon: copulation, 1129; growth, 1227, 1228; parathyroid size, 913; skeleton of vitamin A deficient rats, 657; tetania parathyropriva susceptibility, 913.
Testis extract injection in relation to effects, 866.
Cathode ray (see also X-ray)
Effect on: ergosterol antirachitic potency, 643; skin, 594.
Central nervous system (see name of specific part).
Chloral feeding on growth, 1095.
Cholesterol
Antirachitic value of, 74; fractionated portions, 668; irradiated, 485, 486; irradiated ethers and esters of, 77.
Catalytic formation of an antirachitic derivative, 75.
Content of body, 143; effect upon of feeding hydrocarbons, 144.
Diet preparation free of, 951.
Ergosterol in, 649.
Irradiation effect on: calcium and phosphorus balance, 487; oxidation products of, 1009.
Metabolism of, in relation to gonads, 953; polymerization of, 76.
Spectroscopic study of, 78; synthesis of, 951.

Chlorine, in diet, 835.
Excretion of: influence of potassium on, 832, 834.
Chromosomes, 936, 1177.
Cl. botulinum, 225, 1106.
Coat color. Genetic factors in, 137, 258.
Codeine. Feeding on growth, 1095.
Conduction, spinal and maze habit, 691.
Copper
Hemoglobin of blood in relation to, 327, 792, 1196.
Iron supplement in anemia, 1249.
Metabolism, 721.
Storage in body, 327, 1196.
Correlation of parts of body, 395, 402.
Creatine
Effect of fasting upon, content of: blood, 147; muscle, 147.
Metabolism in nephrectomy, 148; histidine and arginine feeding, 982.
Creatin and creatinin on maze running, 800.
Criterion of learning (see Learning).
Cryptorchidism
Effect upon testicular reactions, 861, 864.
Pseudo, 1136.
Unilateral, 628.
Curves
Growth, 210; on synthetic diets, 452, 453, 842.
Cystine
Action on: kidney, 184, 222; liver, 223.
Content of: body, 719; hair, 719; lentils, 606.
Determination of, by feeding, 1038.
Feeding upon growth, 1034.
Nutritional rôle, 1320.
Relation to cyanide, 1240.
Replacement of: 668, 709, 710, 1291, 1292.

Delayed reaction, 564, 812.
Diets (see also Nutrition and Vitamins).
Drummond and Watson, 37.
On blood regeneration, 776.
Synthetic. Methods of use, 24, 449; on growth, 452; on reproduction, 452, 769; on testicular generation, 816.
Dietary deficiency (see also Nutrition and Vitamins).
Relation to: blood pressure, 41; cannibalism, 774, 1075; epidemic dropsy, 774; fertility, 21, 298, 524, 773, 807, 921, 1072, 1073, 1074; gangrene, 1079; growth, 1316; menopause, 1072; mortality, 1075; pernicious anemia, 774; pubescence, 1072; sex ratio, 1075; stones in bladder, 774.
Digestion
Absorption of fat, 339.
Assimilation of fat, 339.
Bile salts, 823.
Methods of study of digestibility, 66.

Digestion—continued
Secretion, 823.
Yeast proteins, 1117.
Discrimination, 1218.
Auditory, 566, 567, 568, 573, 577, 932.
Brightness, 548, 1102; alcohol on, 79.
Color, 1280.
Distance, 164, 241.
Form, 317, 565, 679.
Localization of sound, 44.
Maze pattern, 1342, 1343.
Moving vs. still objects, 961.
Inclined planes, 994.
Relative vs. absolute stimuli, 347, 470.
Size, 679.
Smell, 714.
Time, 1006.
Visual perception in general, 458.
Weber's law in, distance, 1344.
Distribution of practice (see Learning).
Drives (see Motives).
Drugs (see name of specific drug).
Drug addiction, 949.

Ear, anatomy of, 221, 364.
Earthquake, reaction to, 1242.
Edema, production of, by: low protein diet, 336; serum proteins in, 336.
Eggs, tubal, cytological changes in, 813.
Embryos, transplantation of: foetal reabsorption, 740.
Embryology, 499.
Experimental technique; cerebral anemia, 1176; methods, 898.
Endocrine glands (see name of specific gland)
Feeding on learning, 82.
Enzyme, action of: bone, on organic phosphorus compounds, 619; extract of whole rat, 901; mixtures, 311.
Epidermis, growth of, 737.
Epididymis, weight, in relation to rickets, 587.
Epinephrine, effects of, on: carbohydrate metabolism, 181; in fasting rats, 180; absorbed glucose, 182.
Ephedrine, toxicity of, 151.
Ergosterol, parent substance of vitamin D, 987.
Excretion
Effect of: animal food on, 848; glucose feeding and sugar in urine, 173; nitrogen on, 848; potassium on excretion of sodium, 832, 834, calcium, 834, chlorine, 832, 834, phosphorus, 832, 834; protein feeding on excretion of: nitrogen in urine, 839; sodium thiosulphate on excretion of lead, 224; white flour mixtures, 848.
Hydrogen ion of feces of ricket rats, 1049.

Exercise (see also Activity)
Effect of, on: resistance to infection, 1099; vitamin requirements, 620.
Forced, 1020; effect upon growth, 946.
Exhaust gas, 27, 80.
Eye
Congenital hypertrophy of, 8.
Hemeralopia and vitamin A deficiency, 526.
Ophthalmia, 904.
Avitaminosis, 1103, 1351. Causes of, 780; cod-liver oil concentrate, 261; ferrous sulphate in diet, 609.
Structure, 1230.
Ball: abnormality, 608; growth in relation to: thyroid, 416; thyroid and parathyroidectomy, 390; weight affected by: rickets, 587.
Pupil
Action of pilocarpin on, 656, 1243.
Action of straphonthion on, 49.

Fascia, macrophages and other cells in, 713.
Fatigue
Adrenalectomy, 345.
Castration, 343.
Infection, 9.
Vitamin deficiency, 894.
Fat
Diet on growth, 707.
Formation from carbohydrates, 1289.
Quality related to diet, 18, 278.
Relation to: chronic experimental anemia, 1016; ingestion of tricapron, 279.
Fear upon action of soporific drug, 500.
Fertility
Dietary requirement for, 820, 983, 984, 1151, 1154, 1163, 1165, 1166, 1167, 1169.
Effect upon of: adrenalectomy, 711; chlorinated milk, 959; dietary deficiency, 21, 227, 298, 524, 773, 807, 818, 921, 1072, 1073, 1074; fatness, 921; isospermotoxin, 284; oxidized dried milk, 1147; X-ray, 1091.
Relation to: natural foods, 836; sex ratio, restricted diet, 1075; various strains, 638; speed of reproduction, 30; synthetic diets, 452, 453.
Fixatives
Bouin's solution on median and sciatic nerves, 581.
Nissl substance in nerve cells, 530.
On hypophysis, 7.
Osmic acid on median and sciatic nerves, 582.
Fluorine, ingestion, upon teeth, 779.
Food consumption, relation to pseudopregnancy, 1070.
Fore-limb, anatomy in fetal life, 83.
Form discrimination
Effect upon of area and brightness, 885; visual stimulus, 318.

Foot and mouth disease, rats as carriers, 55.
Furane, action of, 647.

Gartner's bacillus
Fatigue upon mortality and illness, 96.
Distribution in body, 947.
Infection with, 947; in wild rats, 629.
Laboratory epidemic, 43.
Gangrene, produced by deficient diets, 1079.
General treatises, 200, 249, 475, 476.
Genetic factors in, 136. Body weights, 1128; coat color, 879; edema, 463; learning, 1197, 1212; oestrus cycle, 1128; savageness, 1334; temperament, 998; wildness, 1334.
Geographical distribution, 186.
Geotropism
Behavior, 216, 574.
Equilibration of geotropic and phototropic excitations, 214.
Formula describing, 215.
In young rats, 216.
Gestation. Relation to: brown and white bread diets, 445; corn rations, 835; weight of ovaries, 1140.
Glucosone, action of, 479.
Glutathione. Content of: organs, 103, 1187; organs of tumor rats, 1241.
Glycogen
Content: Inanition, 174; insulinization, 174, 185.
Effect upon, of d- and l- lactic acid, 183.
Formation: Epinephrine injection, 185; fructose, absorption of, 177; glycerol ingestion, 138; insulinization, 90, 175, 177, 748.
Gonadectomy (see also Castration and Spaying)
Transplantation anterior lobe from gonadectomized rats on: immature rats, 292; immature ovaries, 304.
Gonads (see also Testes and Ovary)
Development: Anterior pituitary extract, 678; feeding pituitary, 1083; lipoid extracts, influence of: prostate, 659; testes, 659. Water soluble extracts, influence of: prostate, 666; testes, 666.
Hormones on seminal vesicles, 325.
Origin of germ cells, 437, 438.
Relation to: anterior pituitary, 60, 1088; cholesterol metabolism, 953.
Testicular transplantation, 863.
Weight affected by: insulin injection, 477; transplants of anterior lobe from gonadectomized rats, 292.
Gossypol
Toxicity of, 161: Iron salts in counteracting, 341; apogossypol, 162.
Growth (see also Nutrition, Vitamins, and names of specific organs)
Area of median and sciatic nerves, 581, 582.
Constants, 100.
Effects upon of: adrenals, extirpation, 711; anterior pituitary extract, 678; arginine and histidine diets, 980, 981; Bacillus Gartner, 947; bipedal habits, 166, 167; butyn, 833; brown and white bread diets, 445; chlori-

Growth—continued
nated milk, 959; cod-liver oil, 358, 522, 523; corn rations, 835; with NaCl, 847; creatine feeding, 146; egg-whites as source of nitrogen, 85, 87, 1448; fat in diet, 707; gliadin feeding, 17, 703, 903; inanition, 586, 821; insulin injections, 477; irradiated: air, 892, 1283; environment, 555; fat, 358; sawdust, 555. Manganese, 772; ovarian follicular hormone, 107; pituitary feeding, 1083; plants of different stages of development, 440; potassium, 833; seasonal changes, 432; suprarenal cortex and medulla feeding, 158; temperature, 210; vegetables, thrice cooked, 1118; yeast proteins, 1117.
Food requirements, 824, 917, 983, 984.
Method of evaluating vitamin A, 558.
Myelinogeny and behavior, 20.
Relation to: Activity, 1057; diets, 710a, 773, 836, 906, 907; imidazoles substituted for histidine, 196; phosphorus content of body, 1035; purines, creatinine, or creatine substituted for histidine, 195.
Growth constants
During self-accelerating phase of growth, 102.
Equivalence of age, 101.
Gustatory apparatus, 1295, 1296.

Hair
Ball formation, 854.
Chemical composition of, 719.
Head. Weight in rickets, 587.
Heart
Creatine content of, 146.
Growth: Effect of thyroid and parathyroidectomy, 390; in relation to thyroid and parathyroid glands, 413.
Vitamin B deficiency, 322.
Weight in relation to rickets, 587.
Hematoporphyrin. Effect upon calcium of bones in rickets, 1224.
Hemoglobin (see Anemia and Blood).
Hereditary factors (see Genetic factors).
Hermaphrodism, 860.
Heroine. Feeding effect on growth, 1095.
Heterotransplantation of: cartilage, 736; fat, 736.
Hibernating gland. A form of adipose tissue, 1023.
Histidine
Effect on growth, 980.
Substitution for in diets of: ergothioneine, 271; imidazoles, 196, 441.
Synthesis in body, 441.
Histamine. Reaction to, 706, 1237.
Histology (see specific structures).
Hunger (see also Inanition and Motives).
Hydrocarbons in diet. Effects of squalene, 144.
Hypophysis
Effect of: experimental obesity on fat and glycogen in tissues, 314.
Feeding on: body growth, 1083; gonad development, 1083.

Hypophysis—continued
Transplants: from gonadectomized rats, 292, 304; pregnancy, 293.
Gestation, 1178.
Growth, 948, 1014.
Pregnancy, 293.
Hormone
Sex differences in content, 305.
Effect of pregnancy on, 306, 718.
Ovarian changes and implants of tissue and hormone from urine of pregnant women, 307.
Placentomata, 1179.
Weight of parts according to sex, 7.
Hysterectomy
Activity, 266.
Oestrous cycle 266.

Immunity to
Pneumococcus
Duration of, 990.
Feeding; acid-killed germ and influence of age of animal, 991; animals killed by, 988; germ, 989.
Tuberculosis and
Fatigue, 96.
Thyroid feeding, 354.
Inanition in relation to: blood volume, 47; erythrocyte counts, 47; protein, 506; purine metabolism, 1204; rachitic rats, 1052, 1299; weight of body, 47.
Inbreeding
Fertility, 296.
Reaction to transplanted tissues, 738.
Temperament, 1333.
Incentives (see Motives).
Inositol. Synthesis of in body, 889.
Insight. Learning, 470, 546.
Instinctive behavior, 368, 369, 673, 786.
Imitation 71.
Nest building, 637.
Insulin
Effects on: Carbohydrate metabolism, 46, 179, 181; glycogen formation in relation to sugar oxidation, 174; glycogen formation rate in liver, 175; phosphorus compounds distribution in blood and muscle, 618; protein diet, 635; tolerance for sugars, 176.
Irradiation, 288.
Interaction with muscle tissue and glucose, 45.
Intoxication, 1238.
Integration of movements (see Learning).
Integument
Development: on the back, 332.
Effects upon of: high voltage cathode rays, 594; vitamin B deficiency, 322.

Integument—continued
Growth, 737.
Leprosy of, 471.
Weight affected by rickets, 587.
Intestine
Action upon yeast, 962.
Chemistry: Absorption of: amino acid, 1315; calcium, 67, 69; carbohydrates, 67; phosphorus, 69; hydrogen-ion concentration, 795; method of study, 66, 68; reductions: estimation of, 64; measure of putrefaction, 65.
Flora in relation to diet, 217, 514, 554.
Latent period of muscle 15, 539, 540.
Rate of passage, 1189.
Vitamin deficiency, 372.
Hydrogen-ion concentration and vitamin D, 908.
Iron
In relation to: chronic experimental anemia, 1016; nutritional anemia, 857, 858, 1244.
Supplemented by copper in anemia, 1016.
Isospermatoxin, 284.

Jumping rat, 172.

Ketosis
Alkalosis, relation to, 1297.
Factors influencing, 708.
Oxidation of ketone body by isolated liver, 1298.
Production of, 708.
Kidney, 281, 282, 342.
Blood supply, 757.
Calcification of epithelium, 1226.
Creatine content, 146.
Effect upon of: continued polyuria, 491; cystine, 5, 184, 222.
Diet: excess acid, 6; excess alkali, 6; high protein, 5, 589, 590, 626, 761, 762, 897, 902, 907, 960; vitamin deficiency, 322, 372.
Glomeruli, number of, 1229.
Glutathione content. Normal, 1187; tumor, 1241.
Growth, 32 (see also Weight).
Relation to: thyroid, 414; thyroid-parathyroidectomy, 390.
Mitochondria, 1350.
Mitochondria-cytoplasmic ratio, 193.
Nephrectomy unilateral, 33, 34.
Compensatory hypertrophy after, 588, 589.
Nucleocytoplasmic ratio, 188.
Weight, 764.
Relation to: age, 765; insulin injection, 477; pregnancy, 763; rickets, 587; sex, 766.
Kinaesthesis
Spinal conduction in maze habit, 691.

Lactation
Dietary requirements for, 983, 984, 1163, 1169.
Effect of diet:
Brown and white bread, 445; cod-liver oil, 481; corn ration, 835; upon the young, 660.
Effect of on weight of ovaries, 1140.
Leucopenia during, 291.
Lacteals, contractility of, 328.
Lamarckian hypothesis, 785, 788.
Learning, 233, 641, 642, 786, 1076, 1077, 1217.
Alternation habit, 129, 1346.
Apparatus in (see Apparatus)
Association, 1332.
Brain weight relationship, 52, 1045.
Causal factors, 349, 1267.
Compared to human on maze, 578.
Criterion of, 549, 682, 1010, 1263, 1269.
Curves of, 492, 549.
Distribution of practice in, 169, 683, 684, 1010, 1214, 1260.
Drives (see Motives)
Effects upon of: Age, 550, 732, 1130, 1131; alcohol, 35, 758, 787, 789, 806; cerebral cortical destruction, 119, 685, 686, 687, 688, 689, 690, 693, 1223; cerebellar cortical destruction, 775; delay in feeding, 476, 1268, 1279; drugs, 680, 681; endocrine gland feeding, 82; orientation, 134; length of alley, 350, 931, 935; ligation of arteries, 142; oestrous cycle, 42; ovariectomy, 804; pattern of maze change, 350; rotation of maze, 126, 348, 704; subcortical destruction, 492; ultra-violet rays, 805.
Elimination of errors, factors in, 125, 551, 552, 674, 1235, 1261, 1267, 1293.
Genetic factors in, 1212.
Habit interference in, 229.
Hereditary factors in, 1212.
Ideational behavior, 115.
Incentives in, 84, 232, 246, 286, 287, 517, 520, 720, 740, 881, 1021, 1054, 1138, 1207, 1266, 1270, 1271, 1272, 1273, 1301, 1336.
Insight in, 470.
Integration of movements, 1215, 1216.
Kinaesthesis in, 243, 569, 575, 1277.
Length of problem, 1269.
Motives in (see Incentives)
Multiple choice, 115.
Norms of mastery (see Criterion of)
Olfaction in, 128, 1233; removal of lobes, 716.
Perseveration reactions in, 381, 1341.
Preliminary feeding, value of, 1262.
Retroaction, 552, 1282.
Sensory control in, 575, 963.
Stunting, 17.
Successive association in, 130, 132.
Temporal position in, 36.

Learning—continued
Theories of, 243, 688, 811, 933, 934, 1198, 1267, 1312, 1345.
Touch in, 91, 243, 1234.
Transfer of training, 229, 231, 507, 570, 577, 927, 1282, 1313, 1321.
Tuitional controls in, 14, 133, 563, 646.
Vision in, 3, 127, 243, 1139, 1222, 1232, 1347.
Vibrissae in, 1231.
Whole vs. part, 926.
Length of alley (see Learning)
Lens antisera. Effect of on pregnant rats, 324.
Leptospira icterohemorrhagiae
Observations on, 1250.
Occurrence in, 742, 973.
Ligation of arteries (see Learning)
Lipase
Action of extracts, 312, 313.
Critique of the "picture" method, 56.
Liver
Action on of cystine, 223.
Content of: Arachidonic acid, 1287; creatine, 146; glutathione of normal, 1187; glutathione of tumor rats, 1241; vitamin C, 703.
Effect on of: B. Gartner, 947; ether, 1114.
Glycogen and adrenalectomy, 711.
Glycogen formation in insulinized, 175.
Growth of affected by thyroid and parathyroidectomy, 390.
Growth related to thyroid, 414.
Immunity to cancer, 696.
Iron building up in, 1305.
Mitochondria, 1350.
Oxidation of ketone bodies by isolated, 1298.
Phagocytic cells in, 496.
Weight affected by: insulin, 477; rickets, 587.
Vitamin deficiency, 372.
Localization of sound (see Discrimination)
Lungs
Histocyte origin, 337.
Growth
Effected by: thyroid—and parathyroidectomy, 390.
Relation to: thyroid and parathyroid glands, 413.
Vitamin deficiency, 322, 372.
Weight effected by rickets, 587.
Lymph nodes
Changes in senescence, 1290.
Hemal nodes, so-called, 768.
Transplantation of, 815.
Lymphatic system
Absorption from, 220.
Newborn, 494.

Lysine
Synthesis from derivatives of caproic acid, 790.

Magnesium content
Effect upon of: age, 822; inanition, 821; purified diets, 821; variation in food, 289, 472.
Normal, 821.
Mammary gland
Pseudopregnancy, development during, 1070.
Secretion and protein excess, 444.
Manganese
Hemoglobin, relation to, 1196.
Storage in body, 1196.
Marsaction theory, 689, 690, 692, 693.
Maternal behavior, 645a (see also Instinct and Sex behavior).
Factors affecting, 1145.
Parabiosis, living in, 1126.
Maturity. Precocious due to implants of anterior hypophysis, 306.
Maze learning (see Learning)
Mazes (see Apparatus)
Medulla. Metabolism in relation to respiration, 351.
Megakaryocyte nuclei, 617.
Effect upon of: anti-platelet serum, 57; red-cell destruction, 57.
Menotoxin on maze running, 802.
Mental processes (see Discrimination, Learning)
Mesenteric glands. Bacillus Gartner, 947.
Metabolism (see also Nutrition, Vitamins, Carbohydrate, Amino acid)
Amino acids, 750.
Animals immune to cancer, 245.
Arginine, 981.
Calcium, 308.
Cod-liver oil, 89, 922; non-ricketogenic diet, 1048; restricted food intake, 1046; spinach, 89; vitamin deficiency, 644.
Carbohydrate, 755, 756.
Adrenalectomy, 178; epinephrine, 180, 181; insulin, 181.
Carbon monoxide, 1251.
Copper, 721, 791.
Creatine and parathyroid feeding, 1319.
Determination of surface area, 701.
Effect upon of thyroid injection, 1089.
Embryonic tissue, 1275.
Endogenous catabolism, work upon, 849.
Histidine, 981.
Insulin, 120, 181.
Liver at different ages, 457.
Magnesium, 821.
Mineral, 338.

Metabolism—continued
Nitrogen
Food, 848; method of measuring, 839; normal, 820; vitamin A deficiency, 877.
Phosphorus
Cod-liver oil, 89, 922; insulin, 651; non-ricketogenic diet, 1048; spinach, 89; restricted food intake, 1046; vitamin D deficiency, 644.
Purine, 982.
Relation to: arachidonic acid, 1287; arginine, 1116; histidine, 1116.
Sugar, 174.
Zinc, 308, 791.
Methylene-blue injection on body temperature, 1105.
Mitochrondia in cells, factor affecting, 1019 (see also Kidnay).
Momentum, sense of, 1348.
Morphine
Asphyxiation, to delay, 160; growth, feeding on, 1095.
Susceptibility to in:
Adrenalectomy, 760, 977.
Thyroid feeding, 1008.
Morphology of tissue, factor regulating, 50.
Mortality on restricted diet, 1075.
Motivation, obstruction method (see Apparatus)
Motives (see Incentives under Learning)
Musculature
Creatine content, 146.
Elasticity of, 954, 955.
Ether upon, chemistry of, 1114.
Glucose in, 45.
Glutathione content
Normal, 1187; tumor, 1241.
Insulin in, 45, 146, 756.
Panniculus carnosus related to pectoral, 676.
Resting muscle: inorganic phosphate content, 997; lactic acid, 234.
Weight affected by rickets, 587.

Nature of unsuccessful acts (see Learning)
Nausea and vomiting function of, 455.
Nephrectomy, unilateral
Compensatory hypertrophy after, 588, 589.
Creatine metabolism, 148.
Growth, 1081.
Surviving kidney, 33, 34.
Nervous system, 200, 377, 378 (see also name of specific part).
Growth in area of median and sciatic nerves, 581, 582.
Motor nuclei, 19, 518.
Nerve cells, 356, 583; Nissl substance and variations in fixation, 530.
Nerve endings in choroid plexus of fourth ventricle, 163.
Nerve regeneration in Siamese pairs, 880.

Nervous system—continued
Neural folds development, 10.
Vascularity of, 198, 199, 201.
Nest building (see Instinct)
Neural factors (see Learning)
Nitrates, reduction of by tissue, 70.
Norms of mastery (see Learning, criterion of)
Nuclear-plasmic ratio
Basal metabolism and, 1205.
Determination of, 1204.
Nutrition (see also Dietary deficiency, Diets, Excretion, Protein, Rickets, Ultraviolet, and Vitamins)
Anemia and iron, 857.
Arginine deficiency, 109.
Blood volumes in normal, beriberi and fasting, 723.
Body weights in normal, beriberi, and fasting rats, 47.
Bread, brown and white, 662.
Carbohydrate deficiency, 902.
Cod-liver oil in: lactation, 481; pregnancy, 481; reproduction, 524.
Cholesterol deficiency and cholesterol content, 143.
Corn ration, 640, 835.
Grain sorghum, 468.
Growth
Sodium chloride added to corn rations, 847.
Thrice-cooked vegetables, 1118.
Hibernating gland and fat-rich diet and hunger, 1023.
Histidine, 441.
Milk powder, 1027.
Mother's diet, influence on young, 660, 868.
Natural food stuffs and their treatment
Effect on: Growth, 836; reproduction, 836.
Nitrogen
Egg-white, 87; mixtures of white flour and animal foods, 848.
Parents' diet and young, 665.
Plants at different stages of development, 440.
Pregnancy, 1257.
Purified diets, magnesium metabolism in, 821.
Pyloric congenital obstruction, 99.
Relation of to phosphorus content of body, 1035.
Replacement of histidine by: creatine, 195; creatinine, 195; imidazoles, 196; purines, 195.
Reproduction, effect of diet on, 626, 820, 1053.
Requirements for: growth, 623, 624, 916, 917; lactation, 21, 365, 1165; reproduction, 515, 1165.
Requirements: antiscorbutic, 925; growth, 504; potassium, 833.
Rice disease, 47, 1294.
Sex differences, 1256.
Toxicity of: gossypol, 1013; oxbile, 171.
Tryptophane, 490; deficiency, 591; substitute, 62, 63, 592.

Nutrition—continued
Value of: barley, 1094; gelatin, 253, 593; grains, 771; lactalbumin, 903; malt and malt liquors, 1094; milk, dried and evaporated, 448; mung bean, 464; oatmeal, 451; tuberin, 652; tyrosine, diets low in, 718.

Obesity, experimental. Fat and glycogen in tissues, 314.
Oestrous cycle
Effect of lower abdominal sympathectomy, 1175.
Compared with other mammals, 918.
Relation to: absorption from vagina, 40; autocoid, 424; basal metabolism, 700; corpus luteum, 733; learning, 42; mammary gland, 150; ovariectomy, 167; pseudopregnancy, 698, 1070; temperature, 699; thyroidectomy, 697, 698; vitamin B deficiency, 920.
Olfaction in learning (see Learning)
Olfactory bulbs, histology of, 376, 1087.
Optic nerve, area of, postnatal growth, 1252.
Ovary (see also Gonads)
Growth cycles, 11.
Injection of hormone of pregnant women, 307.
Oogenesis, 194.
Relation to: anterior hypophyseal implants, 304, 305, 307; vitamin deficiency, 372.
Rete ovarii structure, 1300.
Transplantation, 734.
Weight: gestation, 1140; lactation, 1140; rickets, 587.
Ovarian follicular hormone, 105, 299, 561.
Action, 1082.
Administration by: spray method, 944; vaginal method, 942.
Evidence for new, 425.
Extraction, 247.
Properties, 247, 331.
Relation to: activity, 106; growth, 107; sex maturity, 12.
Variation in amount, 190.
Ova, migration, 425.
Ovulation, 645a.
Ovarian regeneration, 929.
Ovariectomy: relation to contraction of uterus, 627; effect of upon oestrus cycle, 167.
Oxygen supply and intestine, 373.

Pancreas
Histology, 248, 912.
Relation to vitamin deficiency, 322, 372.
Secretion injections upon, 248.
Parasite
Ancylostoma caninum, development, 1015.
Giardia Lamblia: in stomach, 462; infection with, 461.
Other species, 941.
Insect flagellates, inoculation with, 255, 461.

Parasite—continued
Iodamoeba Williamsi, 1090.
Leishmania donovani, susceptibility, 1349.
Protozoa, intestinal, 460.
Distinguishing characteristics, 633; genus councilmania, 650; method of obtaining amoeba-free rats, 632.
Trichina, 1012.
Trichomonas
Infection, 459, 1284.
Relation to: bacteria of cecum, 956; changes in intestinal flora, 958; hydrogen ion concentration of cecum, 956.
Trypanosomes, infection, 189.
Trypanosomiasis, treatment, 1141.
Parathyroids, 531.
Accessory, 533.
Effect upon of: calcium deficiency, 746; castration, 913.
Feeding upon: appetite, 1319; body weight, 1319; creatine metabolism, 1319.
Hormone, 613.
Relation to composition of bone, 418.
Transplantation, 734.
Parathyroidectomy
Castration and tetany, 913.
Relation to: blood plasma calcium, 1211; composition of bone ash, 393; endocrine glands, 389, 396, 412; growth, 384, 385, 386, 394, 403, 404, 405, 419; humerus and femur, 383, 391, 417; hypertrophy of submaxillary gland, 31; magnesium sulphate, 614; pancreas, 410; refractive index and water content of blood serum, 382, 387; reproductive system, 388; water balance, 421; weight, 392, 420.
Paratyphoid, 611, 828, 1005.
Pasteurella muricida, 826.
Pellagra
Etiology, 1003.
Lesions in vitamin B_2 deficiency, 322.
Periplocin, toxicity of, 767.
Perseverative reactions (see Learning)
Phenols
Action on vitamin A, 580.
Biological relations, 579.
Phosphorus
Absorption, 67, 69.
Content: body: age, 1035; food, 1035; growth, 783, 1035; inanition, 821, 1052, 1198; insulin injection, 618; rickets, 357, 1052, 1299.
Bones, 184.
Bone enzyme upon organic, 619.
Calcium-phosphorus ratio, 644.
Deficiency and bactericidal action of blood, 323.
Effect upon of: irradiated cholesterol, 487; variation in food, 472.
Excretion as affected by K., 832, 834.

Phosphorus—continued
Method of estimating retention of, 86.
Muscle enzyme upon organic, 619.
Phosphoric exterate in ossification, 974.
Phosphoric esters of blood, 362.
Yellow, feeding upon growth, 1096.
Phototropism, 213.
Equilibration of geotropic and phototropic excitations, 214.
Pigeon compared with rat as subject for vitamin B experimentation, 675.
Pilocarpine, action on pupil, 655.
Pineal body
Histology, 478, 584.
Morphology, 478.
Removal, 585.
Pituitary (see Hypophysis), reaction to, 1237.
Placental
Hormone, 615.
Permeability, 94. To alanine, glycine, urea, 751; to ferric and ferrocyanide iron, 104.
Plague
Immunization to, 1011.
Related to number of animals, 290.
Selective mediums in diagnosis, 825.
Toxicity of vaccine, 1115.
Potassium salts
Influence on excretion: calcium, 832, 834; chlorine, 832, 834; phosphorus, 832, 834; sodium, 832, 834.
Pharmacologic action, 739.
Requirements for growth, 304.
Precipitin of rat
Effect on guinea pig, 1100.
Produced by injury to lens, 374.
Pregnancy
Adrenals in, 252.
Influence of diet on young, 660, 662.
Pseudo, 1070.
Preliminary feeding (see Learning)
Procaine feeding on growth, 1095.
Proline, for growth, 1153.
Prostate
Development of genital organs: lipoid extract upon, 659; water-soluble extract upon, 666.
Protein, 840 (see also Kidney).
Biological value of, 841.
Digestibility of, 340.
Edema and dietary content, 336.
Excess and mammary secretions, 444.
Heat and oxidation effect on, 359.
Hemoglobin production, 124.
Intestinal reduction, 65.

Protein—continued
Fur loss, 447.
Relation to: rickets, 93; vitamin B, 444, 450.
Spirochetes and, 554.
Value of in: chocolate, 842; cocoa, 842; connective tissue, 843; heart, 850; kidney, 850; liver, 850; meat parts, 509, 513; milk, 844, 851; pork, 844; wheat, 844; yeast, 1117.
Pulse rate, 541.
Pure-line theory, limitation of, 137.
Pyloric obstruction, congenital, 99.
Pyloric sphincter, innervation, 888.

Quinin and quinidin on learning and retention, 805.

Radium emanations
Relation to: bacteria in blood, 884; intestinal changes, 884; thrombopoenia, 884; vitamin deficiency, 156.
Rat anemia, virus of, 285 (see also Anemia).
Rat and human disease, 28.
Rat-bite disease or fever, 4, 26, 168, 436, 604, 743, 798, 1022, 1142, 1181.
Reasoning, 811.
Refection, 335, 654, 979 (see also Vitamins).
Relative distance (see Learning)
Relative versus absolute discrimination (see Discrimination)
Reliability, 1134, 1135, 1137 (see also Learning).
Respiration, chemical regulation, 351.
Resorcinals, action on protozoa and bacteria, 957.
Retention, 98, 1219.
Curves of, 1206.
Effect upon of: cerebral lesion, 329, 330, 685; cerebellar lesions, 775; injection of quinin and quinidin, 805.
Summary of literature, 1010.
Reticula—endothelial system, injection of proteins upon, 544.
Retroaction (see Learning)
Rhythms in activity (see Activity)
Rice disease (see also Anemia)
Relation to: body weight, 47; blood volume, 47; erythrocyte, 47; food, 47; vitamins, 1294.
Rickets, 527 (see also Vitamin D).
Relation to: acid-base content of diet, 1047; glycerophosphates, 664; hydrogen-ion concentration of feces, 1049; in young and mother's diet, 660; protein, 93; skeleton in castrated animals, 657; spontaneous, 658; tetany, 1051; thyroid, 672; weight of organs, 587.
Rotation on rat, 370.

Salivary glands
Mitochondria, significance of, 528.
Submaxillary
Growth in thryoid-parathyroidectomy, 415; weight in relation to: hypertrophy, 31; rickets, 587; thyroidectomy, 390.

Sarcoma (see Cancer)
Savageness
Genetic factors in, 1334.
Restricted diet, 1075.
Scrotum, function of, 864, 867.
Senescence, lympathic nodules, changes in, 1290.
Sensory processes, 1052 (see Apparatus, Discrimination).
Serum, protein structure in rickets, 280.
Sex behavior, 1119, 1121, 1124, 1125.
Effect upon of: Gonadectomy, 900; orchic extract injection, 900; placental extract injection, 900; segregation, 599, 1127; vasotomy, 900.
Factors determining: in female, 1132; in male, 1120.
Sex determination, 862.
Sex ratio
Various strains, 638.
Early and late breeding, 170.
Seasonal differences, 434.
Sex differences
Activity over life-span, 1057.
Amount of alcohol in brain, 1253.
Growth
Area median and sciatic nerve, 581, 582; food requirements, during, 446; postnatal growth and death, 970.
Hypophysis
Hormone content of anterior, 305; relative weights of three parts, 7.
Sexual activity
Relation to: restricted diet, 1072.
Rhythm in female, 1255.
Sexual life
Development and transplants of anterior hypophysis, 292.
Effects upon of: restricted diet, 1072, 1122, 1123; sex indulgence, 1067; life span, 1069; food consumption, 1066; offspring, 1068.
Sexual maturity, precocious, 1088.
Siamese pairs, nerve regeneration, 880.
Size discrimination (see Discrimination)
Skeleton (see also Rickets, Vitamin D)
Cartilage, formation, 239.
Chemical composition and diets, 153.
Epiphyseal union
Long bones, 237; trunk bones, 238.
Humerus and femur in thyroidectomy, 391.
Ossification, 236, 439, 1101, 1143.
Weight in relation to rickets, 587.
Skin (see Integument)
Sodium
Deficiency in corn rations, 835.
Influence of potassium on excretion, 832, 834.
Necessity in diet, 999.
Pharmacologic action of salts, 739.

Spaying, 706.
Species of rats, 371, 543, 630, 631, 1183, 1184, 1185, 1186.
Spermatozoa
Activity, 865; life in female, 1339.
Spiral organism in, 870.
Spleen
Development of, 1182.
Growth relation to: thyroid, 414; thyroid-parathyroidectomy, 390.
Relation to: Bacillus Gartner, 947; cancer, immunity to, 695; cholesterol metabolism, 952; iron, 1305; vitamin deficiency, 322, 372.
Size in resting animal, 796.
Weight relation to: insulin injection, 477; rickets, 587.
Splenectomy and anemia, 121, 285.
Squills
Red, toxicity of, 1317.
Red and white, toxicity compared, 1318.
Stereotropism, 211.
Sterility (see also Vitamins)
Produced by: calcium deficiency, 626; fatness, 919; inbreeding, 296; infra-red, 218; milk diet, 228, 819, 1157, 1159; vitamin A deficiency, 921, 1164.
Stomach
Glands, 61.
In inanition and malnutrition, 838.
Weight relation to rickets, 587.
Stunting (see Inanition)
Successive association (see Learning)
Sunshine
Altitude of sun and antirachitic effect, 1194.
Antirachitic value through glass, 1192.
Seasonal variations, 1190, 1193.
Skyshine, 1191.
Susceptibility to infection of rachitic rats, 971, 972.
Surface area, determination of, 122, 701.
Sympathectomy, lower abdominal on oestrus cycle, 1175.

Tail
Length in rickets, 587; reaction to pinch, 234a.
Teeth
Abnormalities, 608.
Blood supply of enamel organ, 639.
Changes in composition with age, 817.
Growth: fluorine upon, 779; molars, 250.
Temperament
Effect upon of: genetic factors, 998; inbreeding, 1221; outbreeding, 1221.
Temporal position (see Learning)
Testes
Creatin content, 146.
Efferent ducts, 219.

Testes—continued
Interstitial cell hypertrophy, 910.
Relation to: cortex of adrenals, 1276; lipoid extract of, 659; spermatogenesis, 949; vitamin deficiency, 322, 372; water-soluble extracts of, 659.
Pattern and length of tubules, 51.
Vasa efferentia ligation, 911.
Weight and rickets, 587.
Testicular grafting: degeneration, 816; different environments, 863.
Testis hormone, 865.
Tetany in fasting rachitic rats, 1299.
Theories of learning (see Learning)
Thirst, relation to: behavior, 1273; susceptibility to drugs, 206.
Thymus
Relation to: adrenalectomy, 595; vitamin deficiency, 322.
Transplantation, 363, 815.
Weight relation to: insulin injection, 477; rickets, 587.
Thyroid
Development: embryonic, 671; extract on, 157, 159.
Feeding, 969; relation to senility, 538.
Histology, 797, 1314.
Lateral thyroid, fate of, 976.
Relation to: composition of bone, 418; fever, 202; hair growth, 141; infections, 202; ingestion of lime, 770; metabolism, 532; rickets, 672; tetany, 118; tuberculosis, experimental, 354; trytophan, 1, 140; vitamin deficiency, 322, 372.
Transplantation, 734.
Weight relation to insulin injection, 477.
Thyroidectomy
Relation to: composition of bone ash, 393; endocrine glands, 389, 396, 408, 409, 411, 412, 1325; growth, 384, 385, 386, 394, 403, 404, 405, 422; humerus and femur, 383, 391, 417; nervous system, 406; pancreas, 410; refractive index of blood serum, 382, 387, 785; reproductive system, 388, 407; thyroid extract injection, 1089; water balance, 421; weight, 392, 420.
Time discrimination (see Discrimination).
Temperature, 945.
Regulation in suprarenalectomy, 1329.
Vitamin deficiency, 372.
Tissue
Catalase of malignant, 712.
Culture, method for, 256.
Tobacco smoke and activity, 316.
Tone discrimination (see Discrimination).
Touch (see Learning).
Toxicity of:
Alkamine esters of aromatic acids, 529.
Benzol, 54; ether, 379; magnesium sulphate, 379; para-amino benzoic acid derivatives, 996; potassium salts, 996; sodium salts, 996.

Transfer of training (see Learning).
Tuberculosis
Reaction to inoculation, 355.
Relation to: fatigue, 96; thyroid, 354.
Tularemia in, 244.
Tumors, 108.
Glutathione content, 1241.
Production of, 112.
Tuitional controls (see Learning).

Ultra-violet rays
Antirachitic value, through glass, 748, 1331.
Irradiation upon, 891.
Air, 892, 1283; blood platelets, 204; calcium balance of body, 855, 1113; cholesterol, 482, 483, 484, 486, 487, 488, 893; cod-liver oil, 1330; environment, 555; ergosterol, 643; foods, 154, 268, 480, 1107, 1110, 1111, 1148, 1149; growth, 358; insulin, 288; learning and retention, 805; phytosterol, 482, 483, 484, 486, 487, 488, 893; resistance to infection, 498; sawdust, 555, 556, 986; sterols, 557, 985; tyrosine, 653; vitamin A, 1031; yeast fat, 559.
Urea and uric acid on maze running, 800.
Ureter, factors regulating morphology, 50.
Uterus
Calcium deficiency upon isolated, 627.
Contraction rate of excised and oestrous cycle, 81.
Transplantation, 734.

Vagina, absorption from (see Oestrous cycle)
Vasectomy, 909.
Vibrissæ in learning (see Learning).
Vigor, 262, 263, 264, 266, 343, 344, 501, 534, 535, 536, 537, 538, 702, 803.
Vision in learning (see Learning, 1222).
Visual perception in general, 318, 497.
Vitamins (see also specific vitamins and Nutrition, 29)
Content of foods: alfalfa, 995, 1039; artichoke, 873; barley, 435; beef, 510, 512; beer, 435; butter, 610, 1040, 1162; cheese, 876; citrus fruits, 663, 871, 874, 1103, 1307, 1308, 1310, 1311; cod-liver oil, 259, 261, 610, 1103, 1160; corn, 209, 423, 560, 616, 827, 1154; eggs, 72, 814, 886, 1209; hemp seed, 1154; honey, 545, 636; human milk, 809, 810, 915; lamb, 512; lentils, 606; liver, 703; malt extract, 38, 435, 1103; marmite, 63; milk 88, 155, 269, 360, 448, 489, 562, 744, 745, 773, 782, 872, 914, 1150; oleo oil, 508; papaya, 831; Philippine fruits and vegetables, 1007; pork, 510, 512; poultry and dairy feeds, 353; radish, 875; South African oils, 242; spinach, 154, 794, 1307, 1309; tomatoes, 542; velvet beans, 1000; wheat oil and shoots, 560, 869, 1154, 1160, 1163; white bread, 443; wool fat, 375; yeast fat, 747.
Deafness, 48.
Deficiency on health, 22.
Dietary relationship, 964.

Vitamins—continued
Exercise on requirements, 620.
Hemoglobin production and, 124.
Hydrogenation and, of cod-liver oil, 260.
Intestine in deficiency, 372.
Ophthalmia in deficiency, 1103.
Significance in animal nutrition, 353.
Synthesis in plants as affected by light, 465.
Technique of study, 2, 466, 808, 1208.
Vitamin A
Cod-liver oil, 610. Injected: intraperitoneally, 1092; subcutaneously, 670.
Content of foods (see Vitamin).
Deficiency related to:
Anemia of rice disease, 1294.
Bacillus of mucosus group, 97.
Bacteria in nose and middle ear, 1210.
Bactericidal action of blood, 323.
Blood platelets, 58, 59, 309, 1104.
Chemical composition of bone, 153.
Excretion, 135.
Fatigue, 894.
Fertility, 921.
Gonadectomy, 657.
Hemerolopia, 526.
Infection, susceptibility to, 205, 1286.
Intestines, motor movements of, 372.
Keratomalacia, 321.
Microscopic observation of organs, 372.
Nitrogen metabolism, 784, 877.
Nursing young, 660.
Sexual physiology of female, 297.
Tissue changes, 1213.
Visual purple, 334.
Effects upon of: age of cod-liver oil, 939; diet and sunshine on milk, 744; fats, 333; greenness of plant, 207, 270; growing and dying plant tissue, 191; hardening process, 1353; heat, 192, 1036, 1098; hydroguinone, 580; irradiation (see Ultra-violet); lipoid solvents, 612; rancid lard, 943.
Relation to foods, 114.
Secretion through skin, 375.
Storage, 607, 1026.
Substance inhibiting destruction by ferrous sulphate, 294.
Technique for determination, 558, 890, 1109, 1112.
Factors affecting, 1028; sources of error, 152; standardized breed, 1086.
Vitamin B
Complex nature (see also Vitamin B_2, F and G), 302, 516, 561, 625, 1002, 1004, 1302.
Concentration, 705.

Vitamin B—continued
Copper substituted for in lactation, 1168.
Deficiency in relation to: acid fast bacteria, 226; anemia of rice disease, 1294; bactericidal action of blood, 323; bacillus of mucosus group, 97; blood pressure, 1286; blood sugar, 283; carbohydrate metabolism, 1173; fatigue, 894; infection, susceptibility, 1286; intestines, motor movements, 372, 938, 1085; lactation, 442; microscopic observation of organs, 372; mineral metabolism, 338; oestrous cycle, 920.
Destruction, 184.
Effect upon of: diet and sunlight in milk, 744, 745; fermentation in wort, 1097; heat, 516, 1303; hydrogen ion concentration and destruction by heat, 1029; irradiation, 516.
Relation to: atony of stomach, 993; body temperature and bacterial infection, 319; food, other, 113, 937; growth, 37, 905; insulin, 1144; overdosage, 845; lactation, 300, 450, 1161, 1169; parent's diet on young, 661, 662; protein in food, 245, 444, 960, 1030.
Technique for determination, 469, 778, 1001, 1030, 1032, 1080.
Vitamin B_2 and B-P (see also Vitamins B and G).
Pellagra-like lesions, 322.
Vitamin C
Content of foods (see Vitamins).
Intestines, motor functions of, 372.
Vitamin D (see also Rickets, Vitamins and Ultra-violet)
Catalytic formation from cholesterol, 75.
Effect upon of: fat, 303; reagents, 73.
Deficiency in relation to: bacillus of mucosus group, 97; calcium and phosphorus in intestinal, 187, 1340; chemical composition of bone, 153; hydrogen ion concentration of intestine, 39, 908; irradiation, 480, 1108; phosphorus, 357, 645; urolithiasis, 1225.
Relation to: anemia of rice disease, 1294; cod-liver oil versus ultra-violet, 525; ergosterol as parent substance, 987; hydrogen ion concentration in feces, 940; mineral metabolism, 338; overdosage, 717, 1037.
Technique for determination, 152, 602, 781, 783, 1086, 1093.
Vitamin E
Relation to: destruction by ferric chlorid, 1246; lactation, 1158; paralysis of young, 301; pseudopregnancy, 295; reproduction, 626, 820, 896, 1152.
Technique for determination, 603, 622, 895, 1152, 1155.
Vitamin G, 78, 1025.
Vitamin F, 516, 561, 1025.
Vomeronasal organ, growth of, 9.

Water intoxication, 992.
Water retention under low barometric pressure, 1084.
Weber's law, 1344.
Weights of parts of body, 117, 587 (see also specific part)
Relation to: beriberi, 47; cholesterol content, 143; food, 846; forced exercise, 1020; histidine and arginine, 981, 1116; inanition, 47; parathyroid feeding, 1319; pseudopregnancy, 1070; purine, creatinine, creatine diets, 195; rice disease, 1294; rickets, 587.

Whole versus part (see Learning).
Wildness, genetic factors in, 1334.

X-rays, 519.
Relation to: fertility, 1091; intestinal bacteria in blood, 884; intestinal changes, 884; thrombopoenia, 884.

Yeast
Relation to: bacteria in intestine, 962; gas production in intestine, 962.
Vitamins in, 240.

Zinc
Ingestion, 257, 1188.
Toxicity, 467.

NOTES AND NEWS

MARY WHITON CALKINS, Professor of Philosophy and Psychology at Wellesley College, died on February 27th in her sixty-seventh year. Professor Calkins had been President of both the American Psychological Association and the American Philosophical Association. She had been associated with Wellesley College since 1888, where she established one of the first laboratories of psychology in this country.

PROFESSOR EDWIN G. BORING, of Harvard University, has been elected Vice-President of Section I (Psychology) of the American Association for the Advancement of Science.

BY a gift of the late Edgar Pierce (Ph.D., Harvard, 1895) a Lectureship in honor of William James has been established at Harvard University. Appointments will be made to this Lectureship at least biennially, the appointees being in residence at the University and participating in the regular instruction. Professor John Dewey will be the first lecturer on this foundation. During the spring term beginning February, 1931, he will deliver a series of ten public addresses on a topic not yet announced. The subjects covered in the William James Lectures are not limited in any way, beyond the general condition that they must fall within the field of philosophy and psychology.

THE Sixth International Conference on Psychotechnics will be held at Barcelona, Spain, April 23–27, 1930. The Secretary is Dr. E. Mira, Barcelona.

THE International Congress for Mental Hygiene, to be held in New York, May 5–10, 1930, is to be attended by many foreign delegates. Some of these are available for lecture engagements. For information apply to Dr. George S. Stevenson, 370 Seventh Avenue, New York.

ANNOUNCEMENT of appointments of National Research Fellowships in the Biological Sciences include the following in psychology: reappointments, G. LaVerne Freeman and Donald K. Adams; new appointments, O. D. Anderson, L. W. Gellermann, Dorothy K. Postle, T. C. Schneirla, J. H. Tiffin and John S. Yerakis.

APPROPRIATIONS of the National Research Council's Committee on Grants-in-Aid include the following: Thomas R. Garth for a study of the incidence of color blindness among Indians; Roland O. Travis for an experimental investigation of the speed of reflex and voluntary eye movements and to the Division of Anthropology and Psychology for a preliminary study of the development of negro children.
